- Provide at least one Agency Strategic objective code ([A-11 Section 230](#)) and/or Agency Priority Goal code ([A-11 Section 250](#)) that this investment aligns to on performance.gov. If this investment aligns to more than one Agency strategic objective code and/or Agency Priority goal code list all that apply. If your agency does not report to performance.gov please use "0". This is required for Agency IT Portfolio Summary Part 1 and Part 2 Investments, not for Part 3 Investments.**

Agency Strategic Objective(s):

006SO18250: Conduct a Complete and Accurate Decennial Census

Agency Priority Goal(s):

006APG200119 : Conduct a Complete and Accurate 2020 Decennial Census

- Briefly describe the investment's return on investment, including benefits internal and external to the government and outcomes achieved or planned.**
 Improved data quality and statistical reliability of information benefits policy, decision-making, and the annual allocation of more than \$675 billion of Federal funds. The Federal Government as well as the Census Bureau has already realized substantial programmatic benefits from the ACS. However, the benefits from increasing the quality of ACS data will extend to a wide variety of agencies and programs at Federal, state, local, and tribal levels. The following are examples of programs that will benefit from improved reliability of ACS estimates: >Small Area Income and Poverty Estimates (SAIPE). Improve SAIPE estimates by about 1.4 percent, resulting in improved allocation of \$196 million annually. More small school districts will have a better chance of obtaining accurate and equitable allocations of Title I funds. >Bureau of Economic Analysis (BEA). Improve the quality of the local-level ACS housing and journey-to-work statistics, two key statistics in the production of BEA's state and local area personal

income statistics. BEA's state personal income is used by the Federal Government in formulas to distribute over \$226 billion annually to states. >Title III. In FY2009, Congress authorized over \$700 million in Title III funding for students with limited English proficiency (LEP). ACS data from the English ability questions and questions on place of birth and year of immigration are used to provide grants to states and school districts and to support the education of students with LEP. Improving the reliability of the ACS data would ensure that states receive allocations based on more accurate estimates of LEP and immigrant students living in the states.
